Sidewall height, m	1,72
Center height, m	1,95
Useful area, m <sup>2</sup>	6,9
Tent weight, kg	15
Number of berths	4
Dimensions of package	1 bag with dimensions 35*55*25 cm

## The set includes:

1. Frame arc – 4 pcs.
2. Longitudinal stringer - 3 pcs.
3. Tent awning – 1 pc.
4. Transport bag – 1 pc.
5. Case for tent frame – 1 pc.
6. Wind guy kit – 1 pc.
7. Piece of cloth – 1 pc.
8. Pegs – 10 pcs.
9. Technical certificate – 1 pc.
10. Hanging net for storing and drying things (weight limit no more than 5 kg) - 1 pc.

Tent frame consists of 4 equal-sized arcs. Each of them has 10 segments connected by an elastic band. The frame material, as well as the adapters for connecting equal segments, is made of D16t duralumin alloy.

The tent is made of 100% polyester, Oxford fabric 240 with water-repellent impregnation.

The tent has a chimney cut made of stainless steel and special fiberglass with a silicone double sided coating.

## Functional equipment

The entrance is equipped with a hinged closing system with a zipper for convenient and quick access to the tent. Entrance is for 1 person use.

One of the entrances opens to the floor. To open, it is necessary to unzip the zipper on both sides. At the entrance, there is a large mosquito net window with a curtain.

On the side wall, there is a window made of thermopolyurethane film that withstands low temperatures.

The chimney cut is made of stainless steel and silicone-coated fiberglass. It is designed for stoves with 90 mm chimney diameter. To install stoves with a smaller chimney diameter, use an adapter attached to the chimney valve.

For air access, there is a ventilation window closed with a valve and a mosquito net at the bottom of the tent.

For convenience, the tent has a partition with a zipper dividing the space into 1/3 and 2/3. A small part is suitable for resting and changing clothes, as well as for storing things, setting a table, chairs.

## Assembly order

Start the assembly by installing the frame arcs into the pockets which are located at the tent corners. After it, you need to close the zipper to hold the frame inside. After installing the frame arcs, be sure to install the longitudinal stringers. Do not forget about wind braces, they will protect you from the weather.

Before installing the stove, be sure to open the valve that closes the chimney cut. The valve is fixed with a special loop.

### Precautionary measures

- Fix the tent carefully on the ground to prevent it from overturning.
- Do not use a camping stove and other heating devices in a tent when the wind is more than 10 m / s.
- It is not recommended to install the tent close to the crowns of trees or other tents.
- Do not allow drunk or children to use the tent alone.
- Do not use gas or flammable substances to light the stove.

### Terms of use

The product can be used in temperature from - 40°C to + 40°C. The installation of all wind braces is required. Be sure to observe all safety precautions when installing the stove. Do not install the stove close to the wall of the tent. Use stoves with a spark arrestor. Clean the chimney from soot during prolonged living and use.

### Storage and transportation

The tent should be kept dry. It is recommended to dry the tent after each use. Shake out the sand and leaves from the tent after each use. Clean the tent from dirt with a soft cloth or sponge and soap. Do not use strong chemical cleaners. Never wash the tent in a washing machine and do not iron it. When there are tears, try to glue or sew them as soon as possible.
